### **DCPSC extends RFP deadline for study on value of distributed energy resources in the District**

*Proposal submissions are due on December 17, 2020*

(Washington, D.C.) The Public Service Commission of the District of Columbia (Commission) has extended the deadline to submit a proposal to produce a methodology and metrics for determining the value of distributed energy resources (DERs) in the District. The first phase of the analysis will result in a framework and dynamic pricing formula, which would then be implemented during the second phase. The framework will be used to calculate rates of DER compensation. The extension is for an additional 45 days.

Proposal submissions are now due on December 17, 2020. This study is a part of the Commission's PowerPath DC proceeding ([Formal Case No. 1130](#)) with the goals of ensuring that our energy delivery system remains safe, reliable, and affordable while also becoming more sustainable, interactive, and secure.

An initial draft report of the study is expected 12 months after the consultant begins work. The consultant will then present its findings to the Commission, [PowerPath DC Pilot Projects Governance Board](#) (Governance Board), and other stakeholders. The Governance Board has been established to assist the Commission in executing the [Power Path DC vision statement](#).

For a copy of the RFP, please visit the Commission's [current solicitations and notices](#).

*The Public Service Commission of the District of Columbia is an independent agency established by Congress in 1913 to regulate electric, natural gas, and telecommunications companies in the District of Columbia.*
