Table 10: Customer Choice Program Participation After Various Time Intervals

a/ DC and Virginia programs began in January 1999.

b/ Maryland program began in November 1996.

c/ The percentage of customers choosing an alternative supplier for Virginia represents all residential customers as being eligible to participate. However, due to enrollment limitations, only 30% of all residential customers (as of 1/01) were actually allowed to participate in the program at that time. Effective April 1, 2001, 150,000 Virginia residential customers were eligible to participate in the program.

d/ Effective January 2002, all Virginia residential customers were eligible to participate in the program.

As of April 2004, Virginia data includes Shenandoah Gas data.
